

Physical activity policy status in France

MOVING policy index

This country snapshot presents detailed results of the **MOVING policy index** [1] for France. It highlights strengths and weaknesses in the design of national government physical activity policies. This snapshot supplements the policy index results with an in-depth look at the quality of policy design in each country. Full policy index results are outlined in the MOVING policy brief, which compares France to 29 other European countries.

Main messages

- 1 France implements policy actions in all six areas of the MOVING framework, with the highest rated policy area physical activity opportunities in the workplace and training (O) receiving an excellent assessment, for policies offering physical activity training for non-health professionals and physical activity opportunity in the workplace. This was followed by a moderate assessment for initiatives that promote physical activity in schools, community, and recreation (M), and increasing physical activity through public communication which builds behaviour change skills (N).
- 2 Weaknesses were seen in policy areas targeting active environments, specifically design guidelines (V), transport infrastructure (I), active design guidelines outside of buildings, and walking and cycling infrastructure (V). No national government policy actions were identified on design guidelines for buildings or active design guidelines for open and green spaces, for example (V).
- 3 Much more needs to be done to improve healthcare and outpatient settings on physical activity (G), which received a poor assessment. National government action should be prioritised to implement policy actions in all areas of physical activity structures and surroundings which promote physical activity (V) and transport infrastructure to promote active societies (I), thus improving overall environments that enable physical activity.

Overview of policy status

NO POLICIES IDENTIFIED

POOR

FAIR

MODERATE

GOOD

EXCELLENT

M	Make opportunities and initiatives that promote physical activity in schools, the community and sport and recreation	MODERATE
O	Offer physical activity opportunities in the workplace and training in physical activity promotion across multiple professions	EXCELLENT
V	Visualise and enact structures and surroundings which promote physical activity	FAIR
I	Implement transport infrastructure and opportunities that support active societies	FAIR
N	Normalise and increase physical activity through public communication that motivates and builds behaviour change skills	MODERATE
G	Give physical activity training, assessment and counselling in healthcare settings	POOR

This snapshot is based on national level policies only. Policies issued by provincial, regional or local governments are outside the scope of this project.

Methods

The MOVING policy index methods are fully explained in the associated **policy brief**. In short, the policy index combines values for a) policy presence, and b) policy design for 23 benchmarks.

The benchmarks are applied to policies in the **MOVING database** [2], collected through a comprehensive scan in 30 European countries, including France.

FRAMEWORK: Set of comprehensive policy actions across **3 domains**:

ACTIVE SOCIETIES

ACTIVE ENVIRONMENTS

ACTIVE PEOPLE

Breakdown of policy index results

(For full details on the policy design criteria, consult the [policy brief](#))

 No policy identified	 Meets up to 75% of policy design
 Meets up to 25% of policy design	 Meets up to 99% of policy design
 Meets up to 50% of policy design	 Meets all aspirational standards

	Physical activity in schools and PE	
	Physical activity in and outside of classrooms	
	Physical activity outside of school hours	
	Community and mass participation initiatives	
	Physical activity for people of all ages and abilities	
	Financial incentives to promote physical activity	
	Training for professions outside of healthcare	
	Physical activity in the workplace	
	Design guidelines and regulations for buildings	
	Active design guidelines outside buildings	
	Active design guidelines for open/green spaces	
	Walking and cycling infrastructure	
	Integrated urban design and land-use policies	
	Access to quality public open space and green spaces	
	Policies to support public transport	
	Road safety actions including safety of pedestrians, cyclists etc	
	Mass communication campaigns to promote transport	
	Policies to promote active transport	
	Mass media campaigns and social marketing promoting physical activity	
	Develop and communicate physical activity guidelines	
	Pre- and in-service training within health care	
	Primary care (assessment, counselling and PA prescriptions)	
	Health care and outpatient settings	

Note: The policy landscape in any country evolves over time. These findings reflect our knowledge as of May 2023. To see latest results and for further technical information on the policy indexes, please consult our website: wcrf.org/our-policy-work.
