Physical activity policy status in Romania

MOVING policy index

This country snapshot presents detailed results of the **MOVING policy index** [1] for Romania. It highlights strengths and weaknesses in the design of national government physical activity policies. This snapshot supplements the policy index results with an in-depth look at the quality of policy design in each country. Full policy index results are outlined in the MOVING policy brief, which compares Romania to 29 other European countries.

Main messages

- 1 Romania implements policy actions in only two out of the six policy areas of the MOVING framework. The highest assessment received was fair for initiatives that promote physical activity in schools, community, and recreation (M) and increasing physical activity through public communication which builds behaviour change skills (N).
- 2 Within policy areas, weaknesses are identified throughout, but particularly on policies in promoting physical activity for all ages and abilities (M) and public awareness campaigns promoting physical activity (N). Gaps in national government actions were seen in physical activity outside of school hours and financial incentives (M) and physical activity guidelines (N).
- 3 No action was taken in four out of the six policy areas, therefore greater action needs to be taken in these policy areas to improve the overall environments enabling physical activity in Romania. All types of policies within physical activity opportunities in the workplace and training (O), structures and surroundings which promote physical activity (V), promote public and active transport (I), training on physical activity within healthcare (G) need action by the national government.

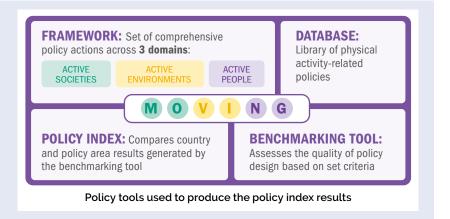

Overview of policy status		NO POLICIES IDENTIFIED	POOR	FAIR	MODERATE	GOOD	EXCELLENT	
Make opportunities and initiatives that promote physical activity in schools, the community and sport and recreation							FAIR	
0	Offer physical activity opportunities in the workplace and training in physical activity promotion across multiple professions					NO POLICIES IDENTIFIED		
V	Visualise and enact structures and surroundings which promote physical activity					NO POLICIES IDENTIFIED		
	Implement transport in	nfrastructure and oppo	ortunities that	support activ	ve societies	NO POLICIES	DENTIFIED	
N	Normalise and increase physical activity through public communication that motivates and builds behaviour change skills				FAIR			
G	Give physical activity to	raining, assessment a	nd counselling	g in healthca	re settings	NO POLICIES	IDENTIFIED	

This snapshot is based on national level policies only. Policies issued by provincial, regional or local governments are outside the scope of this project.

Methods

The MOVING policy index methods are fully explained in the associated **policy brief**. In short, the policy index combines values for a) policy presence, and b) policy design for 23 benchmarks.

The benchmarks are applied to policies in the <u>MOVING database</u> [2], collected through a comprehensive scan in 30 European countries, including Romania.

No policy identified Meets up to 75% of policy design Meets up to 25% of policy design Meets up to 99% of policy design	Breakdown of policy index results (For	(For full details on the policy design criteria, consult the policy brief)			
Meets up to 25% of policy design Meets up to 99% of policy design	No policy identified	Meets up to 75% of policy design			
	Meets up to 25% of policy design	Meets up to 99% of policy design			
Meets up to 50% of policy design Meets all aspirational standards	Meets up to 50% of policy design	Meets all aspirational standards			

	Physical activity in schools and PE		
	Physical activity in and outside of classrooms
