This country snapshot presents detailed results of the **MOVING policy index** [1] for Finland. It highlights strengths and weaknesses in the design of national government physical activity policies. This snapshot supplements the policy index results with an in-depth look at the quality of policy design in each country. Full policy index results are outlined in the MOVING policy brief, which compares Finland to 29 other European countries.

### Main messages

1. Finland implements policy actions in all six areas of the MOVING framework. The highest assessment achieved was good and referred to policy actions on increasing physical activity through public communication which builds behaviour change skills (N).

2. Weaknesses were identified in community initiatives promoting physical activity (M), physical activity in the workplace (O), policies supporting public transport and road safety actions. Gaps were seen in physical activity outside of school hours (M) and active design guidelines (V) where a moderate assessment was achieved.

3. Greater action should be taken in healthcare and outpatient settings on physical activity (G) and physical activity environment in structures and surroundings which promote physical activity (V) where fair policy design was identified, as this was the weakest assessment achieved. Much more needs to be done throughout the entire framework to improve the status of national government policy actions beyond a moderate assessment.

### Overview of policy status

<table>
<thead>
<tr>
<th>Policy Area</th>
<th>Design Quality</th>
</tr>
</thead>
<tbody>
<tr>
<td>M</td>
<td>Make opportunities and initiatives that promote physical activity in schools, the community and sport and recreation</td>
</tr>
<tr>
<td>O</td>
<td>Offer physical activity opportunities in the workplace and training in physical activity promotion across multiple professions</td>
</tr>
<tr>
<td>V</td>
<td>Visualise and enact structures and surroundings which promote physical activity</td>
</tr>
<tr>
<td>I</td>
<td>Implement transport infrastructure and opportunities that support active societies</td>
</tr>
<tr>
<td>N</td>
<td>Normalise and increase physical activity through public communication that motivates and builds behaviour change skills</td>
</tr>
<tr>
<td>G</td>
<td>Give physical activity training, assessment and counselling in healthcare settings</td>
</tr>
</tbody>
</table>

**This snapshot is based on national level policies only. Policies issued by provincial, regional or local governments are outside the scope of this project.**

### Methods

The MOVING policy index methods are fully explained in the associated [policy brief](https://example.com). In short, the policy index combines values for a) policy presence, and b) policy design for 23 benchmarks.

The benchmarks are applied to policies in the MOVING database [2], collected through a comprehensive scan in 30 European countries, including Finland.

- **Physical activity in schools and PE**
- **Physical activity in and outside of classrooms**
- **Physical activity outside of school hours**
- **Community and mass participation initiatives**
- **Physical activity for people of all ages and abilities**
- **Financial incentives to promote physical activity**
- **Training for professions outside of healthcare**
- **Physical activity in the workplace**
- **Design guidelines and regulations for buildings**
- **Active design guidelines outside buildings**
- **Active design guidelines for open/green spaces**
- **Walking and cycling infrastructure**
- **Integrated urban design and land-use policies**
- **Access to quality public open space and green spaces**
- **Policies to support public transport**
- **Road safety actions including safety of pedestrians, cyclists etc**
- **Mass communication campaigns to promote transport**
- **Policies to promote active transport**
- **Mass media campaigns and social marketing promoting physical activity**
- **Develop and communicate physical activity guidelines**
- **Pre- and in-service training within health care**
- **Primary care (assessment, counselling and PA prescriptions)**
- **Health care and outpatient settings**

**Note:** The policy landscape in any country evolves over time. These findings reflect our knowledge as of May 2023. To see latest results and for further technical information on the policy indexes, please consult our website: wcrf.org/our-policy-work. For feedback or suggested updates, please email policy@wcrf.org. More info in the CO-CREATE project can be found at co-create.eu
