Physical activity policy status in Portugal
MOVING policy index
May 2023

This country snapshot presents detailed results of the MOVING policy index [1] for Portugal. It highlights strengths and weaknesses in the design of national government physical activity policies. This snapshot supplements the policy index results with an in-depth look at the quality of policy design in each country. Full policy index results are outlined in the MOVING policy brief, which compares Portugal to 29 other European countries.

Main messages

1 Portugal implements policy actions in all six policy areas of the MOVING framework. One policy area, physical activity counselling, assessment and prescription in health care (G), received a good assessment. Three other policy areas achieved a moderate assessment: initiatives that promote physical activity in schools, community, and recreation (M), increasing physical activity through public communication which builds behaviour change skills (N), and physical activity opportunities in the workplace and promotion across multiple professions (O).

2 Within policy areas, weaknesses were identified on road safety actions including safety of pedestrians and cyclists (I) in addition to developing and communicating physical activity guidelines and public awareness campaigns. Gaps were seen in financial incentives to promote physical activity (M), physical activity in the workplace (O) and campaigns to promote active transport (I).

3 A poor assessment was achieved on structures and surroundings which promote physical activity (V). Therefore, this policy area should be prioritised. Much more needs to be done to improve policies that promote public and active transport (I), where a fair assessment was achieved. Action and good policy design in both of these areas is key to improving overall environments that enable physical activity.

Overview of policy status

This snapshot is based on national level policies only. Policies issued by provincial, regional or local governments are outside the scope of this project.

Methods

The MOVING policy index methods are fully explained in the associated policy brief [1]. In short, the policy index combines values for a) policy presence, and b) policy design for 23 benchmarks. The benchmarks are applied to policies in the MOVING database [2], collected through a comprehensive scan in 30 European countries, including Portugal.

FRAMEWORK: Set of comprehensive policy actions across 3 domains
ACTIVE SOCIETIES
ACTIVE ENVIRONMENTS
ACTIVE PEOPLE

DATABASE: Library of physical activity-related policies

POLICY INDEX: Compares country and policy area results generated by the benchmarking tool

BENCHMARKING TOOL: Assesses the quality of policy design based on set criteria

Policy tools used to produce the policy index results

</tbody>
</table>

#### Physical activity in schools and PE

- Meets up to 75% of policy design criteria

#### Physical activity in and outside of classrooms

- Meets up to 75% of policy design criteria

#### Physical activity outside of school hours

- Meets up to 75% of policy design criteria

#### Community and mass participation initiatives

- Meets up to 75% of policy design criteria

#### Physical activity for people of all ages and abilities

- Meets up to 25% of policy design criteria

#### Financial incentives to promote physical activity

- Meets up to 75% of policy design criteria

#### Training for professions outside of healthcare

- Meets up to 75% of policy design criteria

#### Physical activity in the workplace

- Meets up to 75% of policy design criteria

#### Design guidelines and regulations for buildings

- Meets up to 50% of policy design criteria

#### Active design guidelines outside buildings

- No policy identified

#### Active design guidelines for open/green spaces

- No policy identified

#### Walking and cycling infrastructure

- No policy identified

#### Integrated urban design and land-use policies

- No policy identified

#### Access to quality public open space and green spaces

- No policy identified

#### Policies to support public transport

- Meets up to 75% of policy design criteria

#### Road safety actions including safety of pedestrians, cyclists etc

- Meets up to 25% of policy design criteria

#### Mass communication campaigns to promote transport

- No policy identified

#### Policies to promote active transport

- Meets up to 75% of policy design criteria

#### Mass media campaigns and social marketing promoting physical activity

- Meets up to 25% of policy design criteria

#### Develop and communicate physical activity guidelines

- Meets up to 75% of policy design criteria

#### Pre- and in-service training within health care

- Meets up to 75% of policy design criteria

#### Primary care (assessment, counselling and PA prescriptions)

- Meets up to 75% of policy design criteria

#### Health care and outpatient settings

- Meets up to 75% of policy design criteria

---

**Note:** The policy landscape in any country evolves over time. These findings reflect our knowledge as of May 2023. To see latest results and for further technical information on the policy indexes, please consult our website: wcrf.org/our-policy-work. For feedback or suggested updates, please email policy@wcrf.org. More info in the CO-CREATE project can be found at co-create.eu
