This country snapshot presents detailed results of the NOURISHING policy index [1] for Slovenia. It highlights strengths and weaknesses in the design of national government nutrition policies. This snapshot supplements the policy index results with an in-depth look at the quality of policy design in each country. Full policy index results are outlined in the NOURISHING policy brief, which compares Slovenia to 29 other European countries.

**Main messages**

1. Slovenia implements policy actions in nine out of the ten policy areas of the NOURISHING framework. One policy area received a good assessment, nutrient labelling (N1). Three policy areas received a moderate assessment: limits or removal of specific nutrients in food products (I1), standards on food in schools and other specific locations (O), and increasing public awareness of healthy eating (I2).

2. The lack of limits on the provision of sugar-sweetened beverages in schools and weak rules on unhealthy food availability in the immediate vicinity of schools affected otherwise well-designed standards for school food and food in out-of-education locations (O). Gaps and weaknesses were identified in nutrition advice and counselling in healthcare settings (N2) and increasing nutrition education and skills (G) which received a fair assessment.

3. Priority actions should be taken to use financial incentives to increase the availability and affordability of healthy food (U), and to improve the retail and food service environments (S). Further action should be taken to implement more policy actions within the two policy areas that receive a poor assessment: improve food marketing and advertising to young people (R) and use supply chain actions such as procurement standards to ensure between food systems and health (H).

**Overview of policy status**

This snapshot is based on national level policies only. Policies issued by provincial, regional or local governments are outside the scope of this project.

**Methods**

The NOURISHING policy index methods are fully explained in the associated policy brief [2]. In short, the policy index combines values for a) policy presence, and b) policy design for 41 benchmarks.

The benchmarks are applied to policies in the NOURISHING database [2], collected through a comprehensive scan in 30 European countries, including Slovenia.
## Breakdown of policy index results

<table>
<thead>
<tr>
<th>No policy identified</th>
<th>Meets up to 25% of policy design criteria</th>
<th>Meets up to 50% of policy design criteria</th>
<th>Meets up to 75% of policy design criteria</th>
<th>Meets up to 99% of policy design criteria</th>
<th>Meets all aspirational standards</th>
</tr>
</thead>
</table>

### N: Nutrients
- Nutrients on back of pack
- Front of pack labels
- Warning labels
- Rules on nutrient claims
- Rules on health claims

### O: Food and drink
- Food and drink available in schools, including restrictions on unhealthy foods
- Measures relating to sugar-sweetened beverage provision in schools
- Fruit and vegetables initiatives in schools
- Food and drink available in immediate vicinity of schools
- Unhealthy food in out-of-education locations

### U: Health-related food
- Health-related food taxes or tariffs
- Income related subsidies or initiatives to increase affordability and accessibility of healthy food
- Targeted subsidies or initiatives to increase affordability and accessibility of healthy food

### S: Planning restrictions
- Planning restrictions regarding food service outlets around schools
- Planning restrictions on food service outlets
- Initiatives to increase the availability of healthier food in stores and food service outlets

### H: Governance
- Measures to support food producers to increase healthy food and decrease unhealthy food in the supply chain
- Measures to support food manufacturers to increase healthy food and decrease unhealthy food in the supply chain
- Measures to support food retailers to increase healthy food and decrease unhealthy food in the supply chain

### I: Development and communication
- Development and communication of food-based dietary guidelines
- Public awareness, mass media and informational campaigns and social marketing on healthy eating

### R: Marketing to young people
- Marketing to young people through advertising
- Direct marketing to young people
- Marketing through sponsorship to young people
- Marketing to young people through point of sale measures

### G: Nutrition education
- Marketing to young people through product placement and branding
- Marketing to young people through product design and packaging
- Marketing in/or around schools
- Limit or removal of specific nutrients in food products
