## **Nutrition policy status in Ireland**

NOURISHING policy index

May 2023

This country snapshot presents detailed results of the **NOURISHING policy index** [1] for Ireland. It highlights strengths and weaknesses in the design of national government nutrition policies. This snapshot supplements the policy index results with an in-depth look at the quality of policy design in each country. Full policy index results are outlined in the NOURISHING policy brief, which compares Ireland to 29 other European countries.

## Main messages

- 1 Ireland implements policy actions in eight out of the ten policy areas of the NOURISHING framework. One policy area received a good assessment, referring to public awareness of healthy eating through communication campaigns and social marketing (I2).
- 2 A moderate assessment was received for food standards in schools and other out-of-education settings (O), nutrient labels (N1), and limits or removal of specific nutrients in food products (I1). Gaps on limits on the availability of unhealthy food within the school vicinity and lack of food standards in out-of-education (O) impacted otherwise well-designed policies in this area. There were no actions on nutrition labelling (N1) beyond EU level or on policy actions which decrease young people's exposure to food marketing and advertising through point-of-sale measures and product packaging (R).
- 3 No action was taken in food systems and health (H) or to create a healthier retail and food service environment (S) therefore, implementation within these policy areas should be prioritised. Much more needs to be done to use financial incentives which increases the availability and affordability of healthy food, to accompany the existing sugary beverage tax (U).

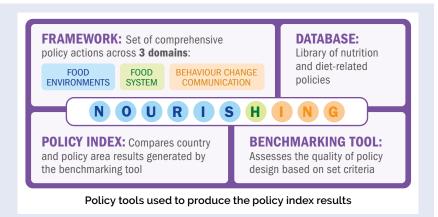

Overview of policy status	NO POLICIES IDENTIFIED	POOR	FAIR	MODERATE	GOOD	EXCELLENT
Nutrition label standards and regulations on the use of claims and implied claims on food					MODERATE	
Offer healthy food and set standards in public institutions and other specific settings					MODERATE	
Use economic tools to address food affordability and purchase incentives					FAIR	
R Restrict food advertising a	Restrict food advertising and other forms of commercial promotion				FAIR	
Improve nutritional quality of the whole food supply					MODERATE	
S Set incentives and rules to create a healthy retail and food service environment					NO POLICIES IDENTIFIED	
H Harness supply chain and actions across sectors to ensure coherence with health					NO POLICIES IDENTIFIED	
Inform people about food and nutrition through public awareness				GOOD		
Nutrition advice and counselling in healthcare settings					FAIR	
G Give nutrition education and skills					FAIR	

This snapshot is based on national level policies only. Policies issued by provincial, regional or local governments are outside the scope of this project.

## **Methods**

The NOURISHING policy index methods are fully explained in the associated **policy brief**. In short, the policy index combines values for a) policy presence, and b) policy design for 41 benchmarks.

The benchmarks are applied to policies in the **NOURISHING database** [2], collected through a comprehensive scan in 30 European countries, including Ireland.

## Breakdown of policy index results (For full details on the policy design criteria, consult the policy brief) No policy identified Meets up to 75% of policy design criteria Meets up to 25% of policy design criteria Meets up to 99% of policy design criteria Meets up to 50% of policy design criteria Meets all aspirational standards
