## **Nutrition policy status in Malta**

NOURISHING policy index

May 2023

This country snapshot presents detailed results of the **NOURISHING policy index** [1] for Malta. It highlights strengths and weaknesses in the design of national government nutrition policies. This snapshot supplements the policy index results with an in-depth look at the quality of policy design in each country. Full policy index results are outlined in the NOURISHING policy brief, which compares Malta to 29 other European countries.

## Main messages

- 1 Malta implements policy actions in nine out of ten policy areas of the NOURISHING framework. A moderate assessment was achieved in only one policy area which related to limits or removal of specific nutrients in food products (I1). This was the highest assessment achieved.
- 2 Gaps and weaknesses were identified with regards to limits on sugar-sweetened beverage provision in schools and unhealthy food in out-of-education locations (O). Much more needs to be done to reduce exposure of food marketing and advertising to young people particularly in/around schools but also through other means of marketing (R), increasing nutrition education and skills (G), along with strengthening public food procurement policies by implementing further policy actions within this area (H).
- **3** No policy action was identified in nutrition advice and counselling in healthcare settings (N2), therefore, action in this policy area should be prioritised. Greater attention should be given to using financial incentives to increase the availability and affordability of healthy food (U), where a poor assessment also was achieved.

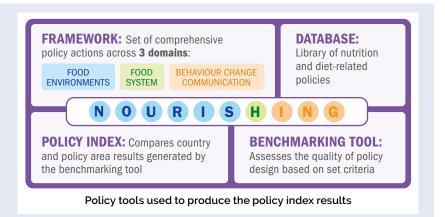

Overview of policy status	NO POLICIES IDENTIFIED	POOR	FAIR	MODERATE	GOOD	EXCELLENT
Nutrition label standards and regulations on the use of claims and implied claims on food					FAIR	
Offer healthy food and set standards in public institutions and other specific settings					FAIR	
Use economic tools to address food affordability and purchase incentives					POOR	
Restrict food advertising and other forms of commercial promotion					POOR	
Improve nutritional quality of the whole food supply					MODERATE	
S Set incentives and rules to create a healthy retail and food service environment					FAIR	
H Harness supply chain and actions across sectors to ensure coherence with health					POOR	
Inform people about food and nutrition through public awareness					FAIR	
Nutrition advice and counselling in healthcare settings					NO POLICIES IDENTIFIED	
G Give nutrition education and skills					POOR	

This snapshot is based on national level policies only. Policies issued by provincial, regional or local governments are outside the scope of this project.

## **Methods**

The NOURISHING policy index methods are fully explained in the associated **policy brief**. In short, the policy index combines values for a) policy presence, and b) policy design for 41 benchmarks.

The benchmarks are applied to policies in the **NOURISHING database** [2], collected through a comprehensive scan in 30 European countries, including Malta.

## Breakdown of policy index results (For full details on the policy design criteria, consult the policy brief) No policy identified Meets up to 75% of policy design criteria Meets up to 25% of policy design criteria Meets up to 99% of policy design criteria Meets up to 50% of policy design criteria Meets all aspirational standards

Nutrients on back of pack  Front of pack labels  Warning labels  Rules on nutrient claims  Rules on health claims  Food and drink available in schools, including restrictions on unhealthy foods  Measures relating to sugar-sweetened beverage provision in schools  Fruit and vegetables initiatives in schools  Food and drink available in immediate vicinity of schools  Unhealthy food in out-of-education locations  Health-related food taxes or tariffs  Income related subsidies or initiatives to increase affordability and accessibility of healthy food  Targeted subsidies or initiatives to increase affordability and accessibility of healthy food
