

# Nutrition policy status in England

NOURISHING policy index

May 2023

This country snapshot presents detailed results of the **NOURISHING policy index** [1] for England. It highlights strengths and weaknesses in the design of national government nutrition policies. This snapshot supplements the policy index results with an in-depth look at the quality of policy design in each country. Full policy index results are outlined in the NOURISHING policy brief, which compares England to 29 other European countries.

## Main messages

- 1 England takes a comprehensive approach to national nutrition and diet-related policy actions by implementing policies across the ten policy areas of the NOURISHING framework. Two policy areas received a good assessment: limits or removal of specific nutrients in food products (I1), and increasing public awareness of healthy eating through communication campaigns and social marketing based on food-based dietary guidelines (I2).
- 2 Within policy areas, weaknesses and gaps were identified in advertising and marketing unhealthy foods to young people, including in or around schools and through point-of-sale measures, product packaging or sponsorship (R). Further, lack of measures targeting the food and drinks available in the immediate vicinity of schools and to limit sugar-sweetened beverage provision in schools impacted otherwise well-designed food standards on food available in schools (O). More can be done to strengthen existing rules and incentives to improve the retail environments (S), as well as to improve nutrition education in schools for teachers and health professionals (G).
- 3 Greater attention should be given to improving food system coherence with health by strengthening public food procurement policies (H) as a poor assessment was achieved. Improvements should be made in advertising to young people (R), nutrition advice and counselling in healthcare settings (N2) and nutrition education and skills (G) beyond a fair assessment.

## Overview of policy status

NO POLICIES IDENTIFIED

POOR

FAIR

MODERATE

GOOD

EXCELLENT

<b>N</b>	Nutrition label standards and regulations on the use of claims and implied claims on food	MODERATE
<b>O</b>	Offer healthy food and set standards in public institutions and other specific settings	MODERATE
<b>U</b>	Use economic tools to address food affordability and purchase incentives	MODERATE
<b>R</b>	Restrict food advertising and other forms of commercial promotion	FAIR
<b>I</b>	Improve nutritional quality of the whole food supply	GOOD
<b>S</b>	Set incentives and rules to create a healthy retail and food service environment	MODERATE
<b>H</b>	Harness supply chain and actions across sectors to ensure coherence with health	POOR
<b>I</b>	Inform people about food and nutrition through public awareness	GOOD
<b>N</b>	Nutrition advice and counselling in healthcare settings	FAIR
<b>G</b>	Give nutrition education and skills	FAIR

This snapshot is based on national level policies only, which include UK-wide and England-only policies issued by the UK government. Policies issued by provincial, regional or local governments are outside the scope of this project. Page 2 highlights which policy areas assess UK-wide or home nation policies.

## Methods

The NOURISHING policy index methods are fully explained in the associated **policy brief**. In short, the policy index combines values for a) policy presence, and b) policy design for 41 benchmarks.

The benchmarks are applied to policies in the **NOURISHING database** [2], collected through a comprehensive scan in 30 European countries, including England.

**FRAMEWORK:** Set of comprehensive policy actions across **3 domains**:

FOOD ENVIRONMENTS

FOOD SYSTEM

BEHAVIOUR CHANGE COMMUNICATION

**DATABASE:**

Library of nutrition and diet-related policies

**N O U R I S H I N G**

**POLICY INDEX:** Compares country and policy area results generated by the benchmarking tool

**BENCHMARKING TOOL:**

Assesses the quality of policy design based on set criteria

Policy tools used to produce the policy index results

### Breakdown of policy index results

(For full details on the policy design criteria, consult the [policy brief](#))

 No policy identified	 Meets up to 75% of policy design criteria
 Meets up to 25% of policy design criteria	 Meets up to 99% of policy design criteria
 Meets up to 50% of policy design criteria	 Meets all aspirational standards

	Nutrients on back of pack*			Planning restrictions regarding food service outlets around schools		
	Front of pack labels*			Planning restrictions on food service outlets		
	Warning labels			Initiatives to increase the availability of healthier food in stores and food service outlets		
	Rules on nutrient claims			Measures to support food producers to increase healthy food and decrease unhealthy food in the supply chain		
	Rules on health claims*				Measures to support food manufacturers to increase healthy food and decrease unhealthy food in the supply chain	
	Food and drink available in schools, including restrictions on unhealthy foods				Measures to support food retailers to increase healthy food and decrease unhealthy food in the supply chain	
	Measures relating to sugar-sweetened beverage provision in schools				Governance structures for multi-sectoral/stakeholder engagement*	
	Fruit and vegetables initiatives in schools			Nutrition standards for public procurement		
	Food and drink available in immediate vicinity of schools			Supporting urban agriculture in health and planning policies		
	Unhealthy food in out-of-education locations			Community food production		
	Health-related food taxes or tariffs			Development and communication of food-based dietary guidelines*		
	Income related subsidies or initiatives to increase affordability and accessibility of healthy food			Public awareness, mass media and informational campaigns and social marketing on healthy eating*		
	Targeted subsidies or initiatives to increase affordability and accessibility of healthy food			Nutrition advice and counselling in primary care		
	Marketing to young people through advertising*			Nutrition advice and counselling in school healthcare setting		
	Direct marketing to young people*			Nutrition education in curricula		
	Marketing through sponsorship to young people				Training for educators	
	Marketing to young people through point of sale measures				Training for health professionals	
	Marketing to young people through product placement and branding				Cooking skills	
	Marketing to young people through product design and packaging*				Training in schools in growing food	
	Marketing in/or around schools		Training for caterers			
	Limit or removal of specific nutrients in food products*					

**Note:** The policy landscape in any country evolves over time. These findings reflect our knowledge as of May 2023.
